Dear Friends,

*STRIDE (Society for Tropical & Emerging Infectious Diseases): is enhancing collaboration in combating infectious diseases and antimicrobial resistance (AMR)*

*In the ongoing battle against infectious diseases and AMR, effective collaboration between microbiologists and clinicians is crucial. STRIDE aims to bridge this gap by providing a dedicated space where professionals from both fields can collaborate seamlessly, sharing knowledge, insights, and resources to develop innovative strategies and solutions.*

*Brainstorming discussions, path breaking approaches on this platform will foster collaboration among microbiologists and clinicians. This collaboration accelerates the development of novel therapies, diagnostic tools, and preventive measures, leading to improved patient care and outcomes*

*Such collaboration will optimize resource allocation & efforts, leading to cost-effective solutions in the fight against infectious diseases.*

*With a global community of microbiologists and clinicians, the platform will facilitate international collaborations and knowledge exchange, addressing global health challenges collectively.*

*In conclusion, STRIDE will serve as a catalyst for innovation and collaboration between microbiologists and clinicians in combating infectious diseases and AMR by promoting interdisciplinary cooperation and knowledge-sharing, it contributes to advancing healthcare practices, safeguarding public health, and promoting sustainable one health approaches worldwide.*

*Sincerely*

*The Organizing Committee*
