Product Specification

Product Info

Product Name	BiomLife®
Brand	Ruhvenile®
Type	Universal transport medium for collection, transport, and preservation of any specimens
USP	Supports the viability of both aerobic as well as anaerobic microbes (bacteria, fungi, viruses, phage's, including fastidious microbes) irrespective of their cfu.
State	Liquid
Volume	3.0 mL/unit
Colour	Transparent
Summary	BiomLife® is a universal transport medium to collect, transport, and preserve a wide range of microbes and biological specimens for extended periods of time. It preserves tissues and maintains the viability of aerobic and anaerobic microbes and the integrity of nucleic acids. Later, specimens can be used for metabolites analysis, PCR, RT-PCR, Metagenomics, Metabolomics, Proteomics, Culturomics, Functional genomics and more...
Storage temperature of BiomLife®	At ambient temperature > 24 months
Microbes supported	Aerobic as well as anaerobic microbes
Protocols for usage	Recommended using 1:1 ratio of specimen samples and BiomLife® media, then vortex for 30-45 secs and store at respective temperature to maintain viability and integrity.
Specimen stability temperature and time	RT:48 h, 4°C:7 days, -20°C: >90 days, -80°C: >912 days
Batch No	RVNBL30A000120241018
Date of Manufacture	18 October 2024

Product Use:

The product can be used to collect any kind of specimen from hospital, environment, reproductive systems, nasal, stool, and any sample that may have microbes.

Attention:

BiomLife® is not a Drug and/or medicine. It can only be used for in-vitro activities. In case it is swallowed, please consult a physician. BiomLife® should be stored in dry and dark place. Keep away from children.
